

THE DIFFERENCE BETWEEN SURVIVING AND LIVING

Most people buy life insurance to leave a financial legacy for those left behind, but what if your client suffers from a heart attack, cancer, or stroke, and continues living?

Considering that medical debt is among the leading causes of bankruptcy in the U.S.,¹ a critical medical condition could create a serious financial hardship for your clients and their family.

That's where Trendsetter® LB comes in.

It's not their grandparents' term life insurance policy. Trendsetter LB offers clients living benefits to help replace income and cover added expenses should they experience a qualifying chronic, critical, or terminal illness. It's protection for when clients need it most — and for only a few dollars more a month.

In some cases the premium difference between term with living benefits (LB) and term without can be surprisingly low. For example, a 30 year old man who is preferred risk and has a \$500,000 death benefit for 30 years will pay \$2.15 more for Trendsetter LB than for he would for Trendsetter Super.

\$6K – \$10K+

Cancer diagnosis costs can range from almost \$6,000 to over \$10,000 a year.²
